ABOUT ME

I am Harry John with great achievements in +7 years.

I have been treated with high respect from the management due to the closer relationship between members and my high skills, and I have tried best to repay them.

I like solving mathematical problems and can set up accurate algorithms for even the most complex requirements.

The projects I have written, from the code writing rules to all requirements, have been welcomed from customers and almost had no maintenance.

My rich experiences will greatly contribute to the development of not only me but also the company in the future.
